Preface to the Revised Edition

Educators across the United States and throughout the world have experienced firsthand the extraordinary power of the *First Steps in Music* curriculum to nurture a child's musical growth and lay the groundwork for a lifelong enjoyment of music. At GIA Publications we believe that children and music educators deserve only the very best materials, and it is in this spirit we present the revised edition of the *First Steps in Music* curriculum.

When new information about the racist histories and context of some of the folk songs in the *First Steps* curriculum was brought to our attention, the Feierabend Association for Music Education (FAME) formed a committee to develop a set of standards for determining whether repertoire may be used with young children without being harmful, derogatory, or disrespectful. This revision is a result of applying those standards to the repertoire, and the complete text of the committee's recommendations is included on page 277. We believe it is important to continue learning and adapting to new information, and we encourage teachers to always be mindful of whether literature is appropriate for their particular classroom.

As part of this revision teachers will find an updated and expanded repertoire of songs and rhymes. The curriculum's structure and sequencing remains the same, however the sample lesson plans at the back of the book have been updated to reflect the new repertoire, and the curriculum's three corresponding CDs—*Had a Little Rooster* (CD-1089), *There's a Hole in the Bucket* (CD-1090), and *Old Joe Clark* (CD-1091)—along with the track number references in the curriculum book have been updated as well.

With this revision we continue to recognize the importance of making high-quality songs and rhymes from diverse cultures available to music educators and their students. In this revision we have added new repertoire from other world cultures and also offer suggestions for pedagogically appropriate global music that can be found in a variety of supplemental resources. To round out our efforts, we are including general translations of songs and rhymes in world languages so that teachers and students alike may connect more completely with the material.

We are also sensitive to the fact that teachers must select repertoire appropriate for their school environment and population, so we have developed a webpage (www.giamusic.com/dei) dedicated to providing teachers with relevant and up-to-date information about the history, context, and

subject matter of the songs and rhymes included in the curriculum. Additionally, scholars and educators have the opportunity to submit feedback about repertoire via this webpage.

Teachers are especially encouraged to discover and nurture songs meaningful to their school's student population and community. One way to build community and preserve cultural heritage is by inviting families to share the songs and musical traditions of their culture. *The Family Folk Song Project* (available from GIA Publications, G-9523) is an excellent resource for connecting musical experiences between home and school.

The importance of using traditional songs and rhymes in the music classroom cannot be overstated, and this revision represents a steadfast commitment to supplying only the best of the best for music educators as they inspire and cultivate the next generation of tuneful, beatful, and artful humans.

Music for Your School Community

Communities are created when individuals synchronize through shared cultural experiences. Every citizen should have one or more musical cultures (bubbles) with which they feel connected.

The general music teacher has the unique challenge of making decisions about how to integrate various cultural experiences into their curriculum.

Start with the repertoire that is most meaningful to the unique community of families you are empowered to teach. (See *The Family Folk Song Project* (G-9523) for song-gathering strategies.) Meet your community with their musics. Integrate this music regularly in lessons.

I encourage all people to know/experience one or more folk music cultures that are meaningful to them. Each teacher should provide and balance repertoire reflective of their local community and then, gradually over the years, add other folk cultures and styles of music, including classical music, from most familiar to least familiar. And there should be no competition for “the best” culture, for all have gifts and all have flaws.

John M. Feierabend

Welcome to First Steps in Music

During the past sixty years families have been redefined. Where once there were large families living in close proximity, now the nuclear family is much smaller and more geographically dispersed. This shift in the family community has strained the continuation of aural traditions. The playful songs and rhymes that were once shared by many generations of children and by adults with children are gradually being forgotten. Those songs and rhymes that have demonstrated community affection and endorsement through the evidence of oral transmission are being replaced by commercially imposed ear candy, literature that often provides a temporary rush but lacks long-term nutritional value.

The *First Steps in Music* series attempts to preserve the rich repertoire of traditional and folk literature and to enable today's families to recall and learn songs and rhymes that have nurtured wonder and joy in young people for generations. The authentic affection, innocence, and wonder of these songs and rhymes have the potential to plant the seeds for lifelong sensitivity and imagination.

The songs and rhymes contained in this book have been gathered over the past twenty-five years. Many of the most interesting examples were collected from the elderly, who often recalled songs and/or rhymes with great affection, reminding them of loving moments they had shared with young people in the past.

The *First Steps in Music* curriculum is based on an extensive survey of research related to the development of singing and movement skills in young children, as well as many years of practical experience sharing musical activities with this young age group. It is this combination of a research-based curriculum, high-quality literature, and practical experience that makes the *First Steps in Music* curriculum exceptional.

It is my hope that this curriculum and the collections of songs and rhymes presented in this series will help others to nurture a sense of wonder and a love of singing and dancing in future generations.

John M. Feierabend

Table of Contents

Getting Started	7
The Musical Workout	11
Pitch Exploration (Vocal Warm-ups).	15
Song Fragments	23
Echo Songs.	26
Call-and-Response Songs	44
Simple Songs	51
Arioso.	67
SongTales	71
Movement Exploration (Movement Warm-ups)	109
Movement for Form and Expression	117
Fingerplays	120
Action Songs.	136
Circle Games.	138
Movement with Classical Music.	146
Beat Motion Activities	149
Child-Initiated Songs and Rhymes – Stationary	153
Teacher-Initiated Songs and Rhymes – Stationary	161
Teacher-Initiated Songs and Rhymes – Traveling	176
Planning Lessons	181
Sample Lessons	187
Final Thoughts	273
Appendix: Diversity, Equity, and Inclusion Statement	277
Index of Song/Rhyme Titles	280
About the Author	282

Getting Started

Age Grouping

The *First Steps in Music* curriculum is organized according to the following age grouping:

For Infants and Toddlers

Music in My First Year!

Music, Now I'm One

Music, Now I'm Two

For Preschool and Beyond

Had a Little Rooster: First-Year Lessons

There's a Hole in the Bucket: Second-Year Lessons

Old Joe Clark: Third-Year Lessons

Setting Up Preschool Parent/Child Classes

Room

- A large, carpeted room (400 square feet or larger is ideal).
- The room should be clear of furniture and other items to encourage roaming during the group time. Cleanliness of the carpet is essential! Colorful decorations may be placed on the walls.
- There should be storage space for miscellaneous teaching aids. This space should be inaccessible to children.
- There should also be a place for coats, boots, etc.

Equipment

An excellent sound system is necessary for playing recordings during movement activities.

Class Size

An ideal size is eight to ten children with their parents. Too small of a class makes some group activities unsuccessful. Too large of a class does not allow for desired individual attention.

Lesson Plans

Use lesson plans. Keep track of which activities are done from week to week. Forms for planning your own lessons as well as sample lesson plans are provided later in this book.

Printed Materials for Parents

- Create word sheets of all songs and rhymes for a given semester. This will enable parents to more effectively remember the activities at home. Word sheets for the sample lessons are included with the corresponding CDs (*Had a Little Rooster*, *There's a Hole in the Bucket*, *Old Joe Clark*).
- Weekly or bi-weekly information sheets could be distributed concerning various aspects of music and movement development. Too much information all at once will be almost as useless as no information at all.
- The *First Steps in Music Parent Handbook* (G-9693) by Connie Greenwood is a concise and detailed guide that establishes the goals and objectives for First Steps in Music classes.

Nametags

It is best to be able to invite each child by name during many of the activities. If you are good with names, you may only need nametags in the early semester. Others may wish to create more permanent nametags to be picked up and worn each week.

Length of Each Class

Group time for these classes can be thirty to forty-five minutes.

Length of Semester

This is a matter of preference; eight, ten, twelve, fourteen, fifteen, and seventeen weeks long are all possibilities, as well as mini summer semesters. Less than eight weeks may not give children time to acclimate themselves to the activities. The sample lesson plans at the end of the book are meant for twelve-week programs.

Registration

Have parents register and pay tuition by semester. This encourages regular attendance.

Establishing a Price for Classes

- This varies from community to community. Check the prices being charged for other related parent/child classes in your area, such as baby swimming or toddler gym classes. Underpricing the program implies lesser quality. Overpricing places restrictions on who can afford to attend. Ten to twenty dollars per session is a typical fee.
- Consider offering scholarships to qualifying families.

Teachers

Teachers in Music and Movement classes should:

- 1) Possess an accurate and pleasant singing voice.
- 2) Sing songs and speak rhymes with expression.
- 3) Be comfortable in movement and dancing activities.
- 4) Be knowledgeable about music and movement development of this age group.
- 5) Be able to share all songs and rhymes from memory.
- 6) Be personable and comfortable with both children and adults.

Preparing Parents for the Classes

Parents-Only Meeting

Have an evening meeting for all parents new to the program to review the class format and expectations, or mail a simple welcome letter and parent handbook with guidelines. Share the following information with parents.

Unique Aspects of the First Steps in Music Curriculum

- The curriculum is based on folk and traditional songs and rhymes because of their ability to connect generations and because of their natural melodic expressiveness, natural flow of the language, and texts filled with wonder.
- The curriculum is based on early childhood research related to the development of:
 - 1) Music intelligence;
 - 2) Singing skills;
 - 3) Sensitivity to the beat and beat groups;
 - 4) Expressive movement;
 - 5) Musical memory;
 - 6) Preferences; and
 - 7) Neurological connections.

Goals for Children

To experience activities that will prepare children for the development of:

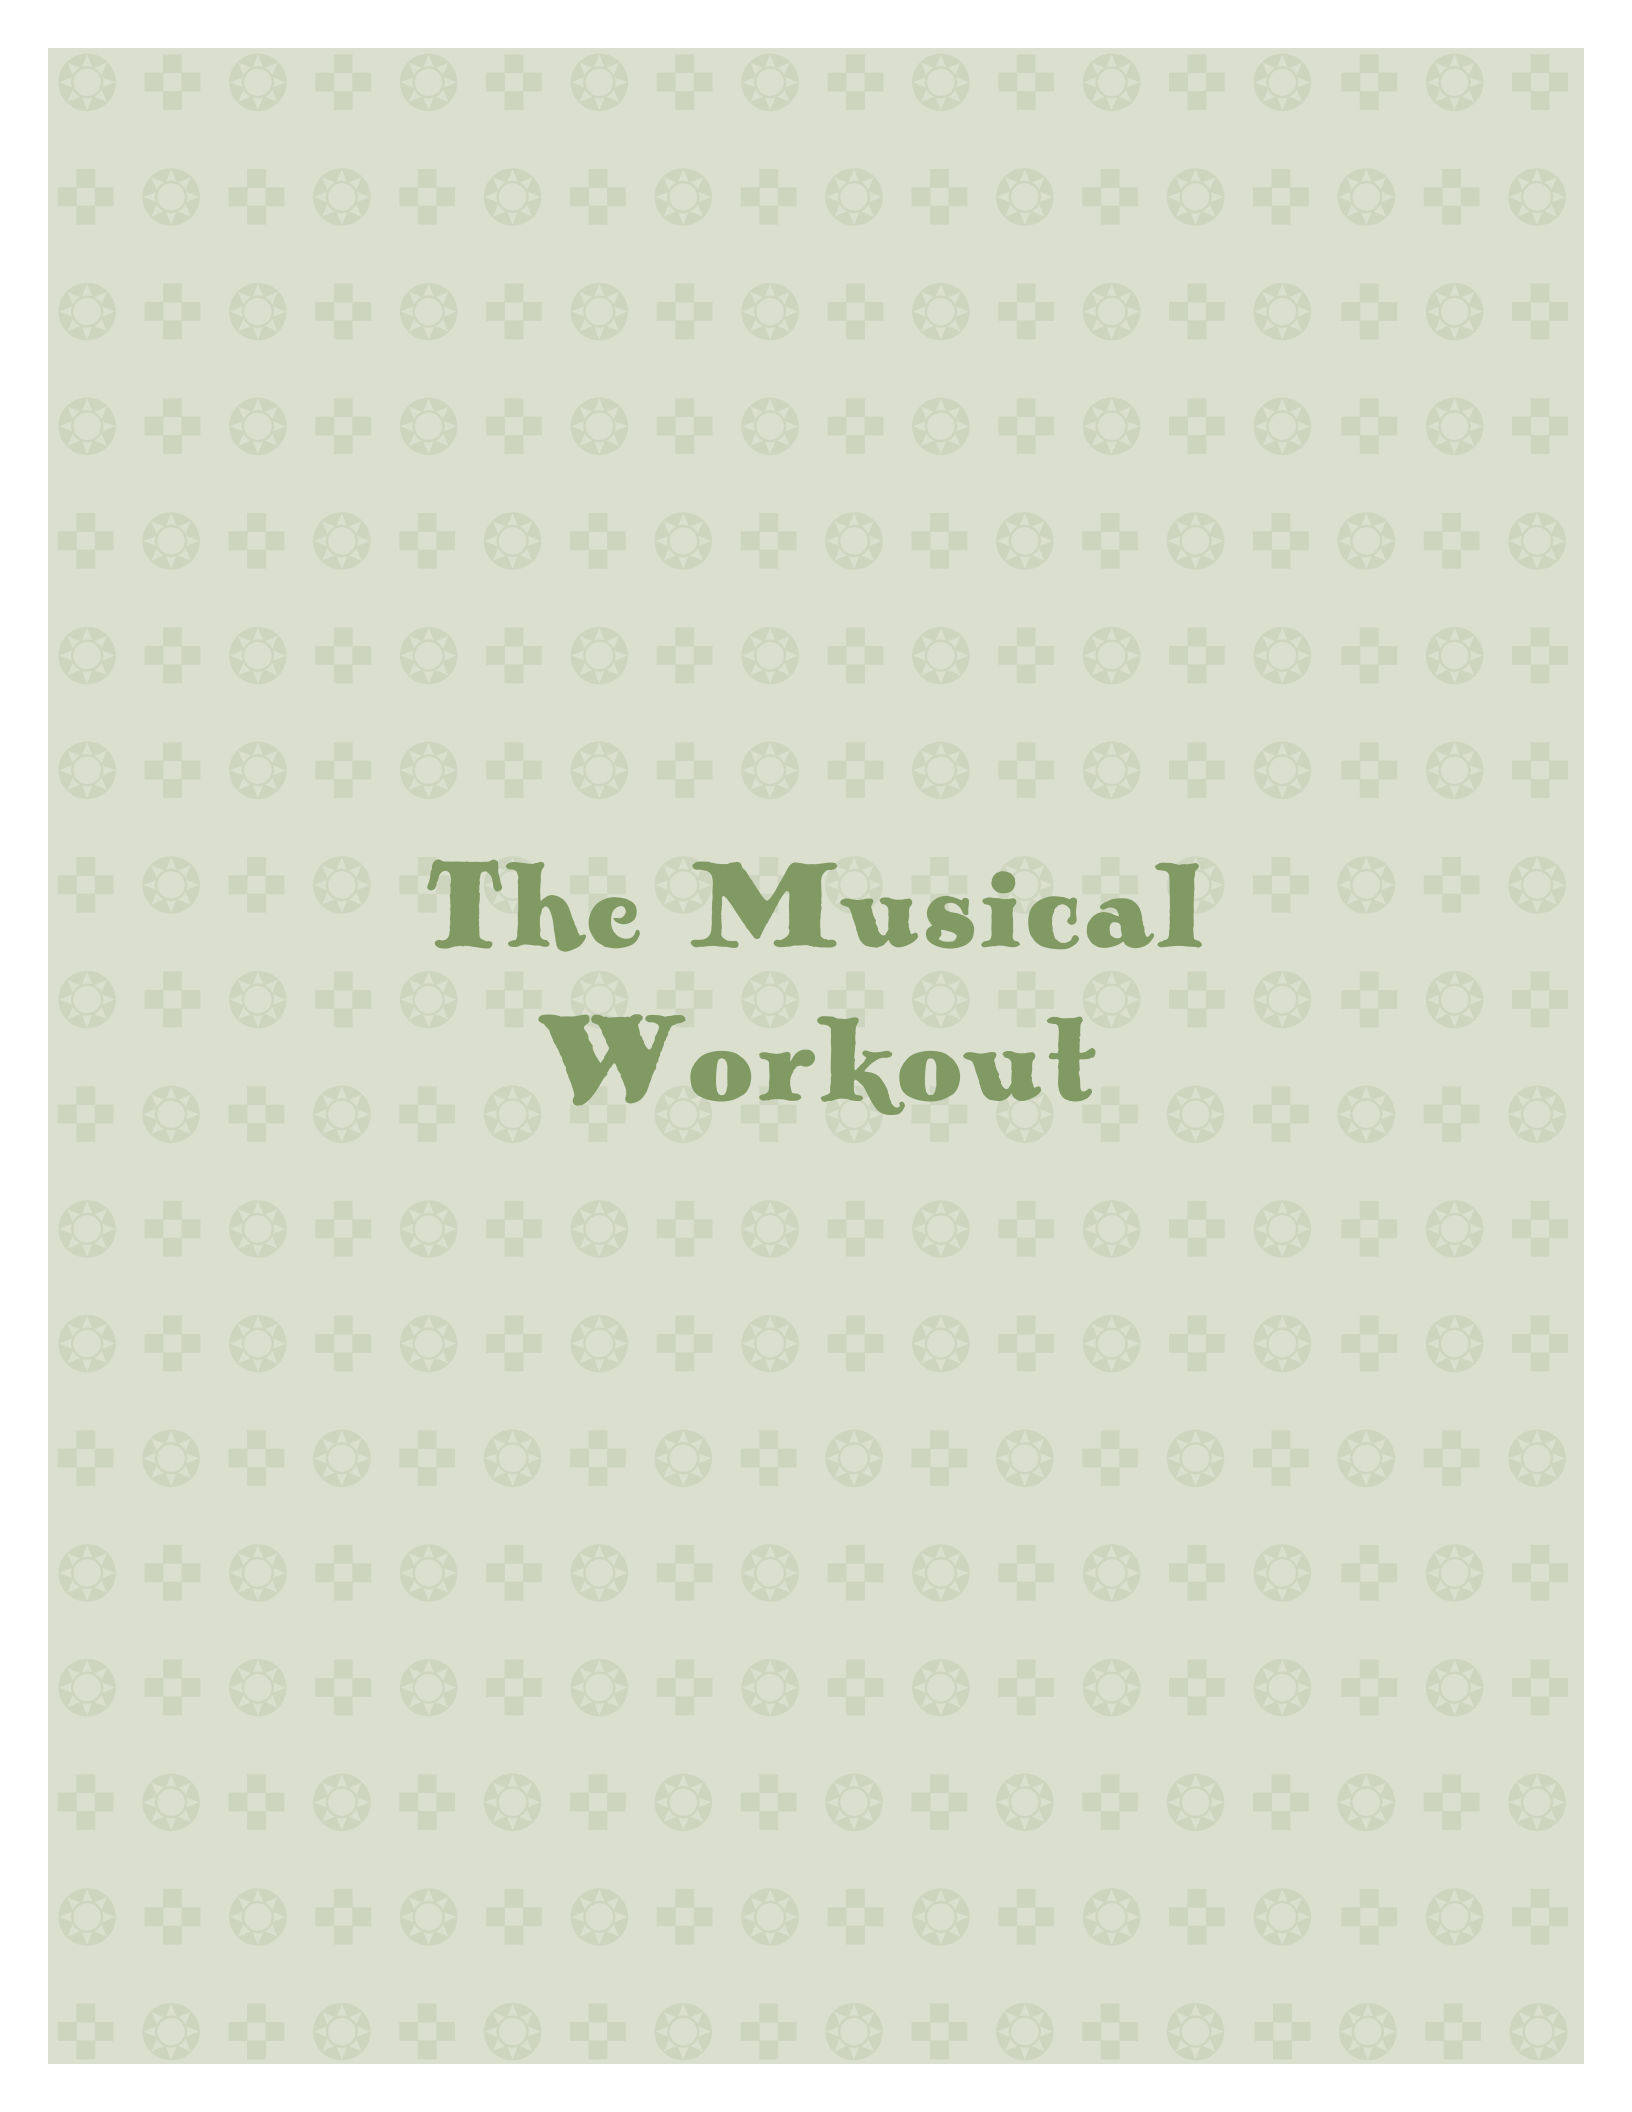

- 1) Accurate rhythmic skills;
- 2) Accurate singing skills; and
- 3) Sensitivity to the expressive qualities in music.

Suggested Guidelines for Parents

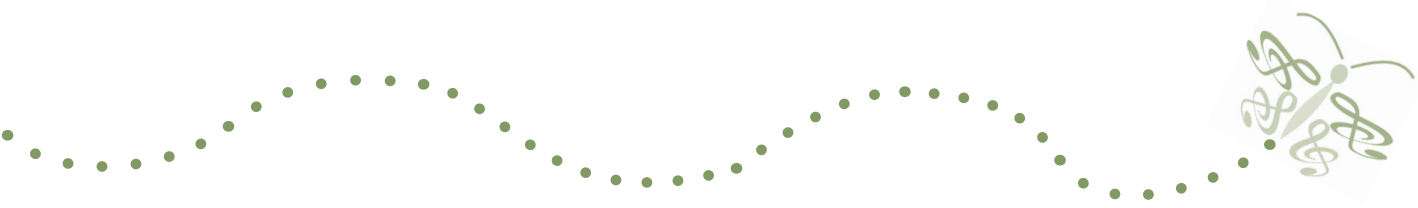

- Parents should participate in all activities.
- The classes are for the parents to learn the activities as well as for the children's enjoyment.
- Children often are unresponsive in class and participate more freely at home between classes. This is normal. Parents should learn the activities during class time so they can share them during more receptive times at home.
- Children may roam during class as long as they do not interfere with other children's attention.
- Occasionally invite a roaming child back to the group, but do not force the child to participate.
- Try not to talk to other adults during classes. Focus on your child.
- Do not compare one child's accomplishments with another's. Children develop at different rates. Later development is sometimes better!
- The *First Steps in Music Parent Handbook* (G-9693) by Connie Greenwood is a concise and detailed guide that establishes the goals and objectives for First Steps in Music classes.

Video Resources

During a parent meeting you may wish to show *Music and Early Childhood* (DVD-499), a thirty-minute video produced by Connecticut Public Television and available through GIA Publications. This video features prominent authorities discussing early childhood music, movement research, and philosophy, as well as showing children in action in music classes and at home. The following DVDs also provide examples of music classes in action: *First Steps in Music: In Action* (DVD-947) and *First Steps in Music Kindergarten and First Grade: In Action* (DVD-1052). All three DVDs are available to stream online by visiting www.giamusic.com and searching the item number.

The Musical Workout

The *First Steps in Music* curriculum is designed to prepare children to become musical in three ways:

- 1) Tuneful – to have tunes in their heads and learn to coordinate their voices to sing those tunes.
- 2) Beatful – to feel the pulse of music and how that pulse is grouped in either twos or threes.
- 3) Artful – to be moved by music in the many ways music can elicit an emotional response.

All adults should be tuneful, beatful, and artful so they can participate in the music that is interwoven throughout their lives. Adults who are tuneful can sing lullabies to their babies, sing “Happy Birthday” to their children and friends, sing in worship services, and join others in singing ceremonial songs like alma maters or heritage favorites. Adults who are beatful can rock on the beat while singing that lullaby, dance at their weddings or at their friends’ weddings, and can clap their hands in time with others at a sporting event. Adults who are artful are moved by music and seek out venues to share artful experiences with others in concert halls, in community bands and choirs, or by listening to National Public Radio. Artful adults enjoy being moved by music.

Adults who are tuneful, beatful, and artful are also better able to participate in a community and are able to enjoy opportunities to sing together with others, dance together with others, and share listening to beautiful music together with others.

Children who learn to be tuneful, beatful, and artful before they leave elementary school will grow to be adults who benefit from what music can offer. Those who go on to sing in choirs or play an instrument will do so in a more musical manner. Those who choose not to sing in choirs or play an instrument later will still be enriched by being able to share music in their daily lives.

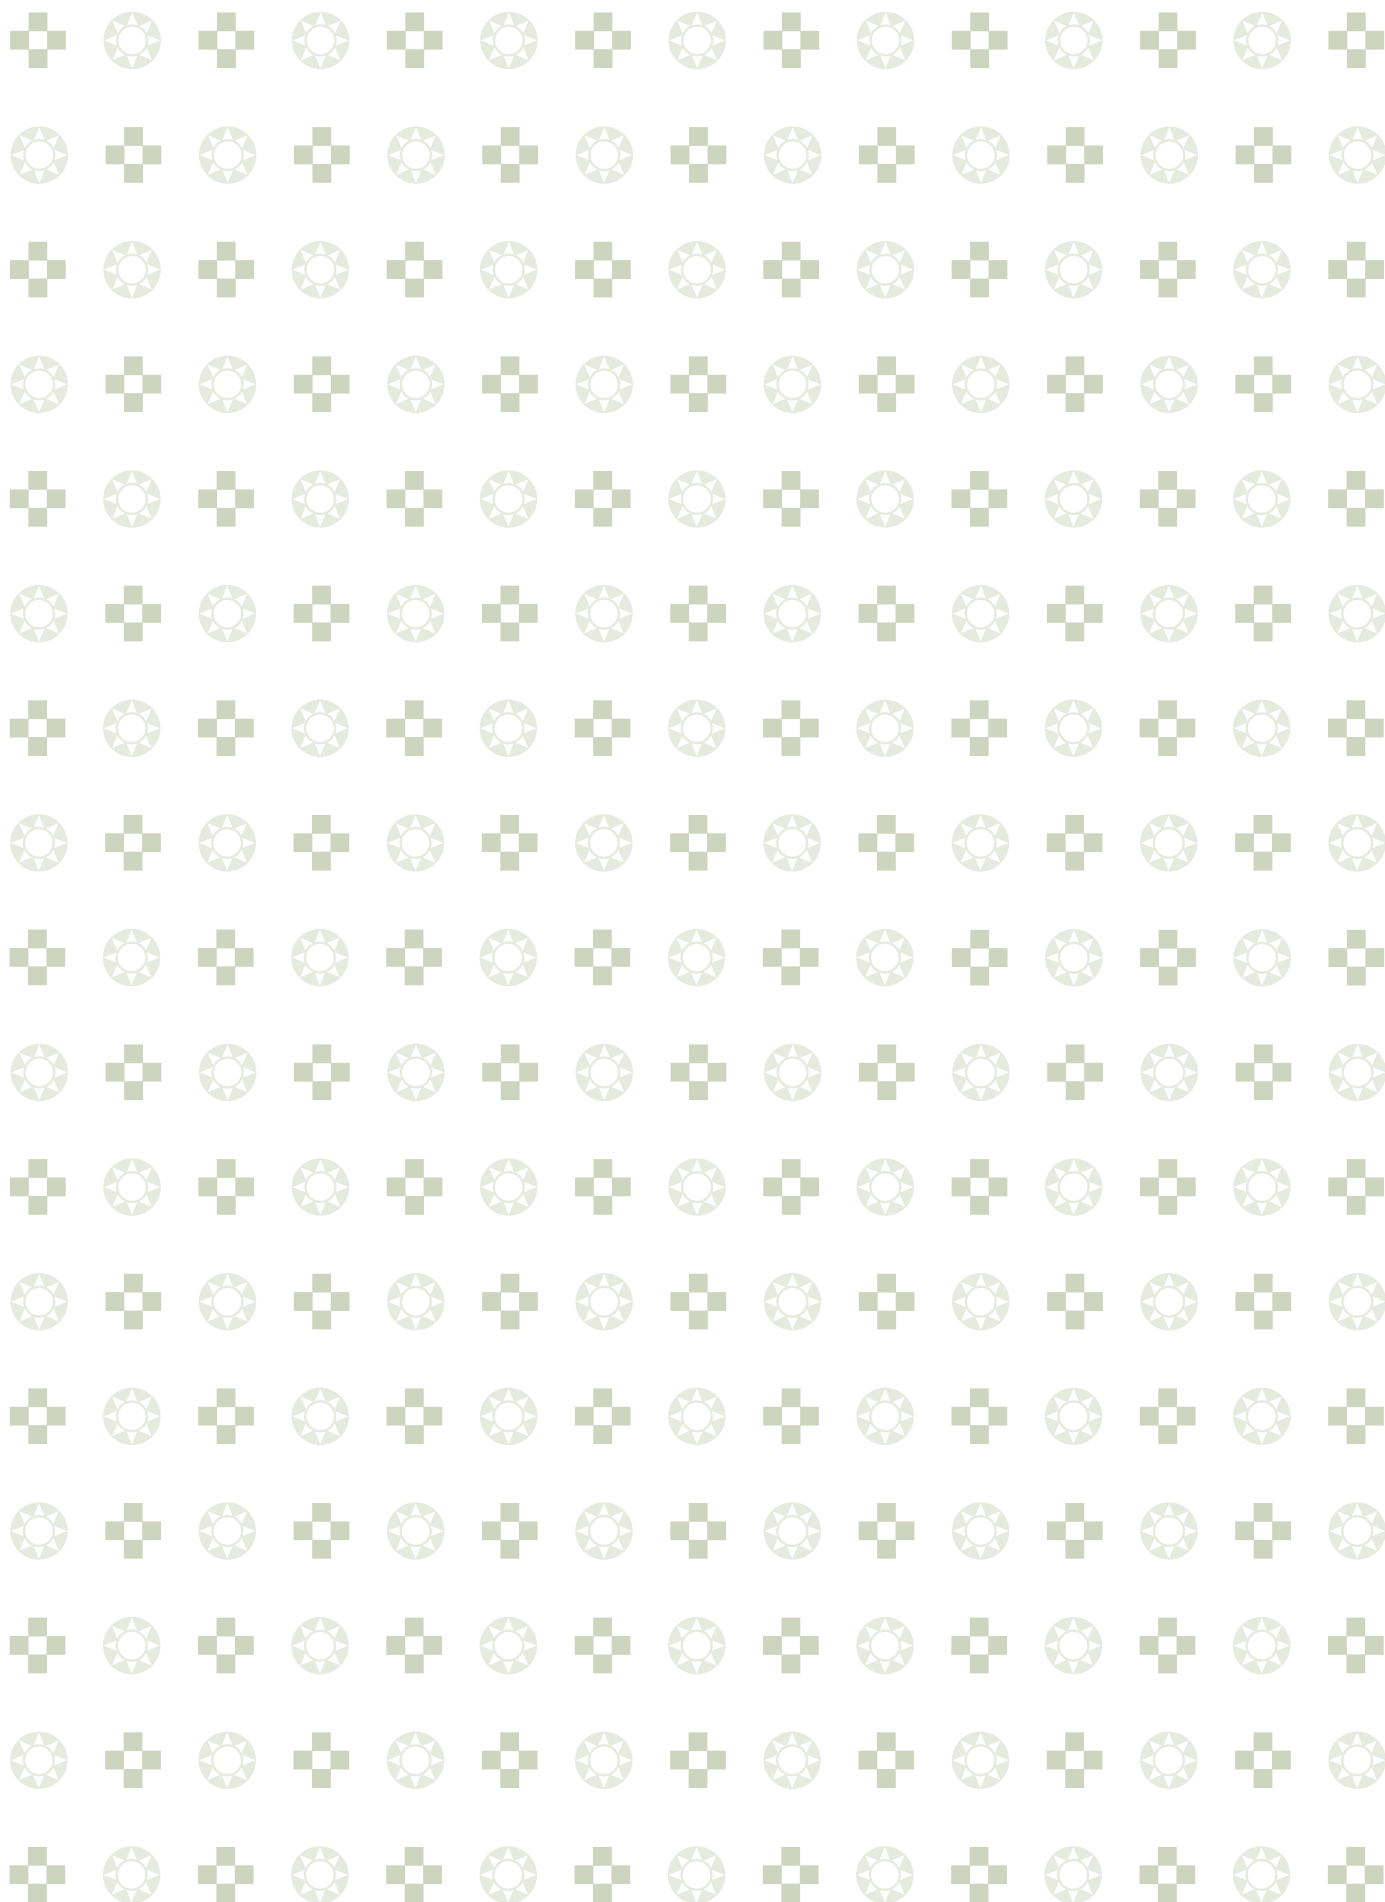

The *First Steps in Music* curriculum is a musical workout that grows tuneful, beatful, and artful individuals. There are eight different activities in each workout. And, like an aerobics class, in the beginning some participants will likely be clumsy in some aspects of the workout, but if they give it their best, they are bound to improve! And, like an aerobics workout, the more one participates, the better the effect. Balancing repetition and variety is key to each workout being effective and interesting.

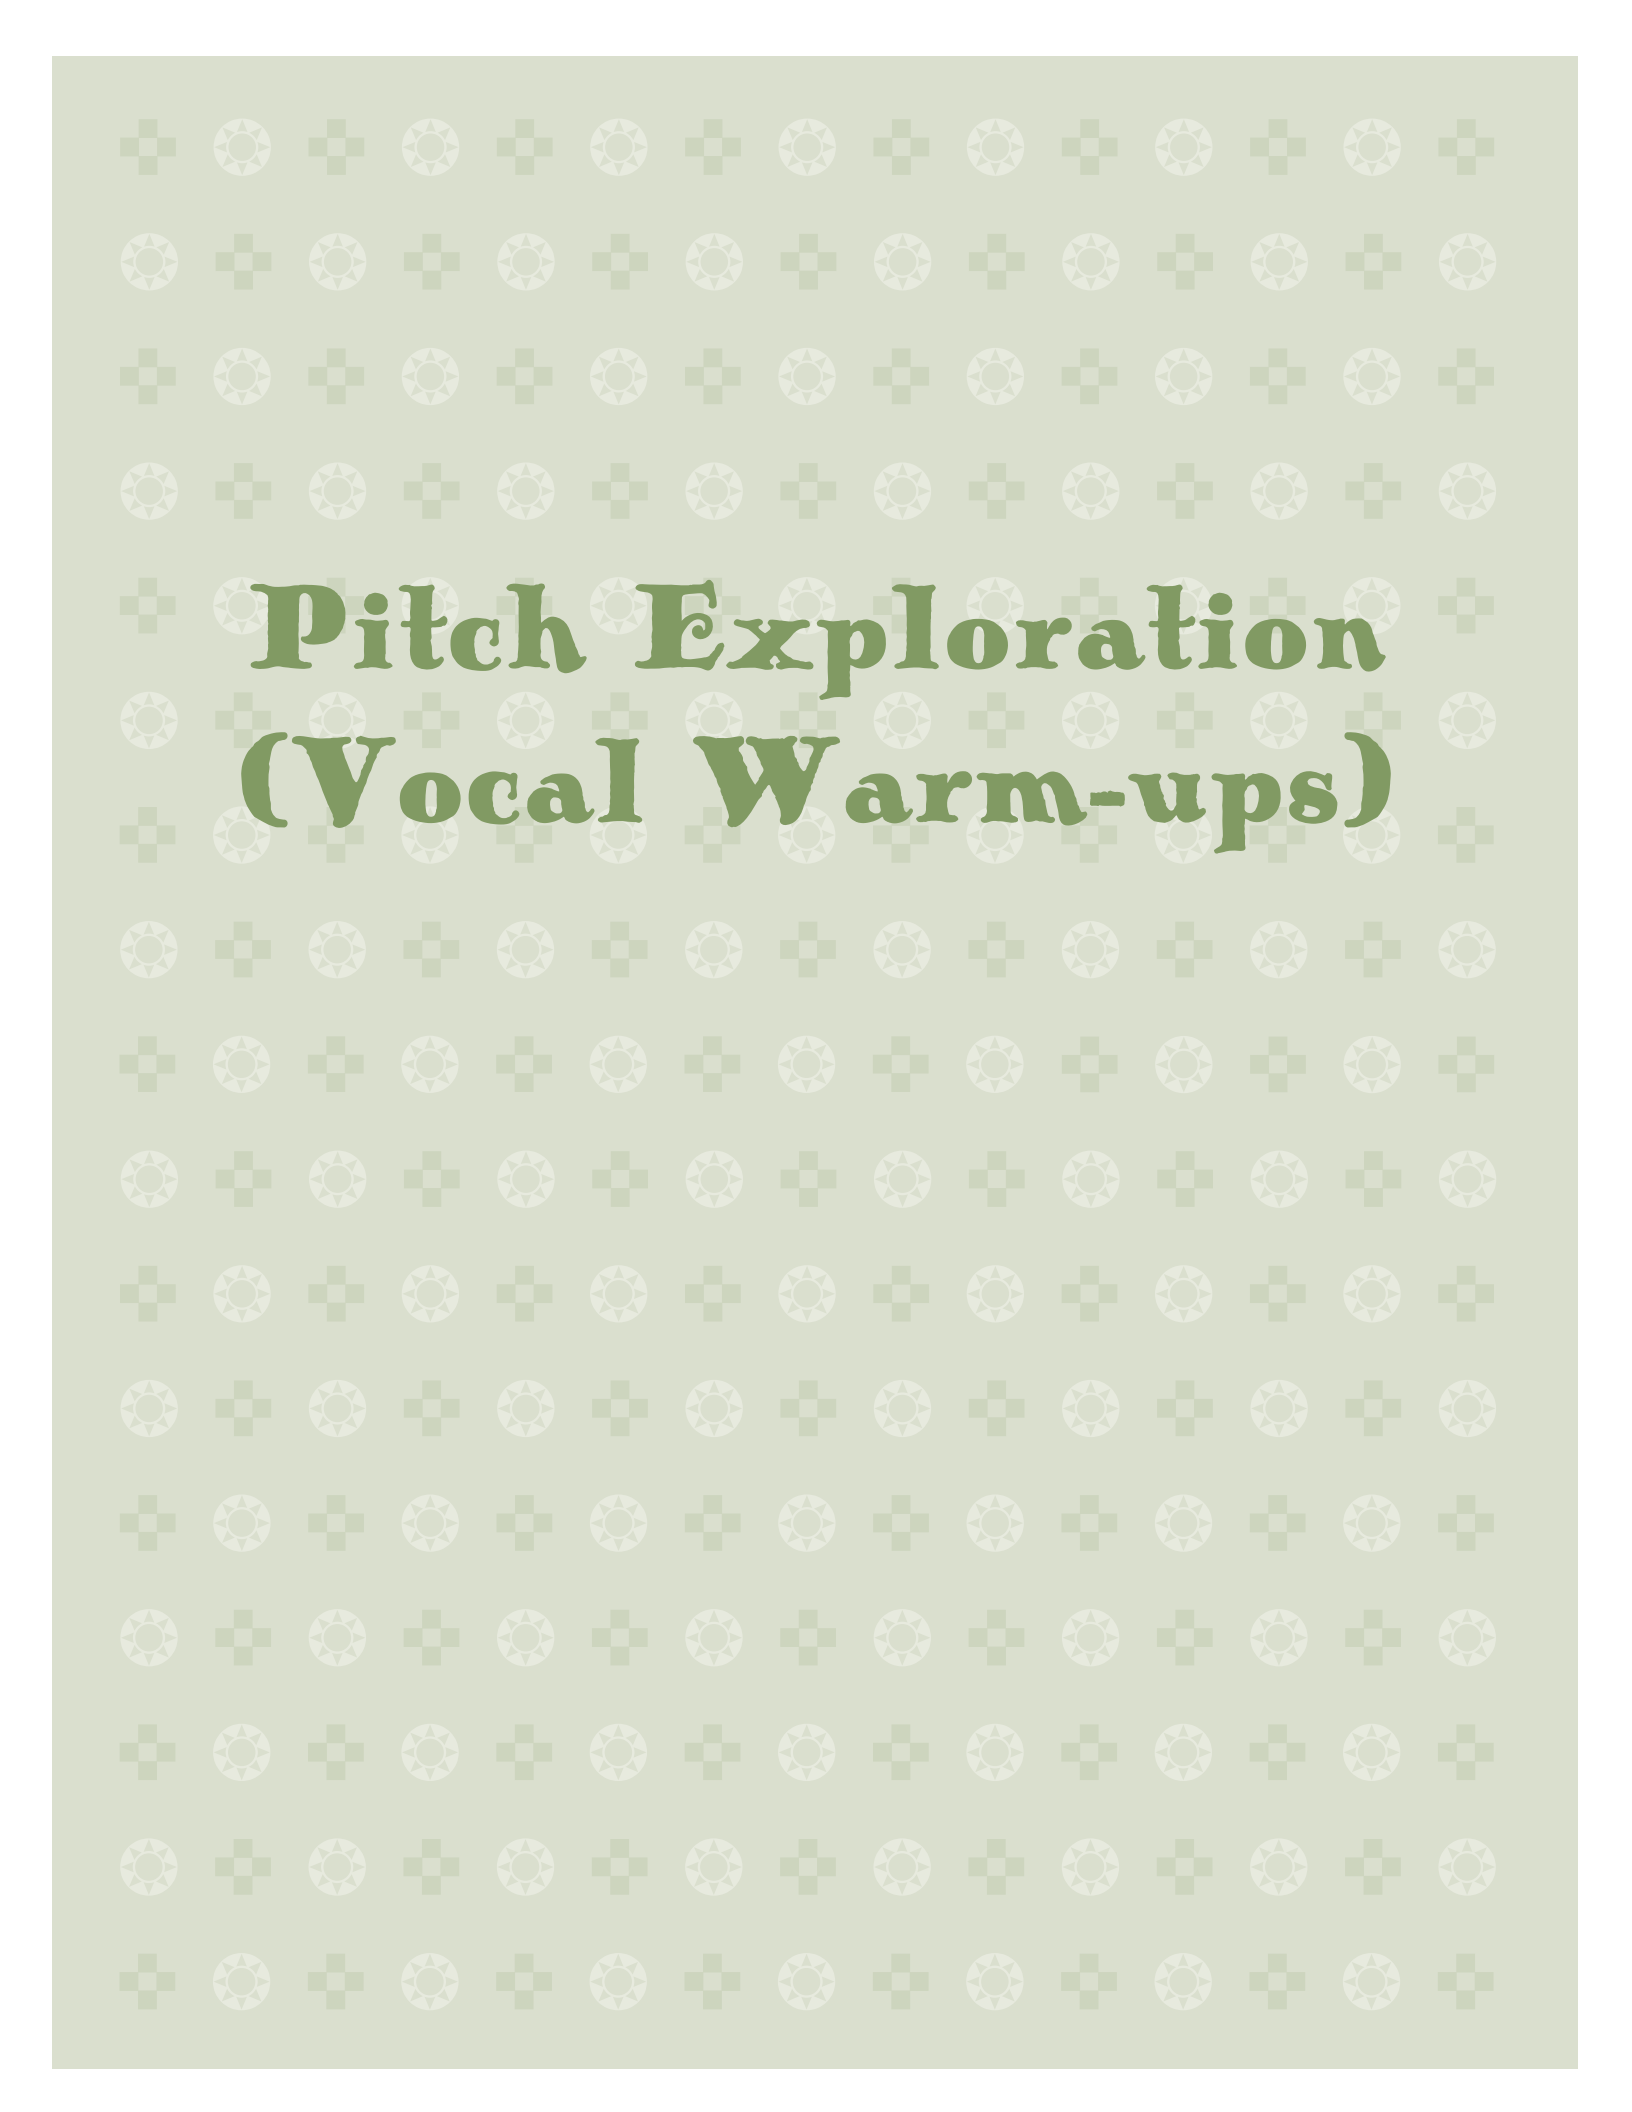

The following are the eight musical workout activities:

- 1) Pitch Exploration (Vocal Warm-ups)
- 2) Song Fragments
 - Echo Songs
 - Call-and-Response Songs
- 3) Simple Songs
- 4) Arioso (Child-created Tunes)
- 5) SongTales
- 6) Movement Exploration (Movement Warm-ups)
- 7) Movement for Form and Expression
- 8) Movement with the Beat

There are aspects of tuneful, beatful, and artful development in most of these activities. However, workouts 1, 2, 3, and 4 are especially tuneful; 5, 6, and 7 are especially artful, and 8 is especially beatful. Complete descriptions and many examples of each of the eight activities appear in the following pages.

These workouts are designed to be effective with children starting at age three but are equally effective through the elementary years. In the second half of this book, three years of sample lessons are provided. The first-year lessons could be used with three-year-olds but could also be used with kindergarten or first-grade children if they have had no previous musical experiences. The three years of lessons progress in difficulty, so begin with the first-year lessons regardless of age, and continue with the second- and third-year lessons in succession.

Pitch Exploration (Vocal Warm-ups)

The Purpose of Pitch Exploration Activities

These sliding sounds help children engage the vocal muscles used to sing in head voice. These muscles are the preferred muscles to use when singing at this age. Just as an athlete warms up certain muscle groups before exercising, singers should warm up the correct singing muscles with activities such as these before singing.

Techniques

- It is not enough to invite children to simply make sounds during these activities. Insist on the right kinds of sounds (head voice sounds).
- It is better to begin with descending sliding sounds and add ascending sliding sounds after the correct muscles are engaged.
- After the group becomes comfortable making the sounds, move around the group asking children to take turns making the sounds. The most learning takes place when a child participates individually.

Things to Remember

- Present each activity in at least four different lessons.
- Once the group is comfortable with an activity, invite solo responses.

Pitch Exploration Ideas

Pipe Cleaners

Make several bends in a pipe cleaner and hold it in front of the class. With one finger, trace the outline of the pipe cleaner as you instruct your students to make vocal sliding sounds to match the rise and fall of the pipe cleaner's shape.

Later, try this exercise in small groups with students leading their classmates. Continue until everyone has had a chance to be the leader for the group.

Yarn Shapes (Floor Yarn)

Divide students into small groups, and give each group a long piece of yarn. Have an individual in each group create a shape with the yarn on the floor (or on a felt board). The one who made the shape should point to the yarn and follow it from one end to the other while the others in his or her group perform sliding sounds with their voices to match the shape of the yarn. Repeat until all have had a turn to create a yarn shape.

Instrumental Glissandos

Glissando sounds can be made on various instruments, such as slide whistle and siren whistle. Invite your students to imitate the sliding sounds with their voices. Start with descending sounds to ensure that the head voice is engaged in the sound making, and later add ascending sounds and other sound shapes.

Pathway Cards

Create a set of picture cards by drawing a line on each card to represent the shape of a vocal glissando. Present the picture cards to your students, and have them create glissando sounds to match each shape.

Later, allow students to take turns arranging four cards in a row to create a sound composition for the class to perform.

Toys That Move

A Propeller on a Stick and a Magnetic Wheel (Wheel-o toy) are good for vocal glissando exercises. Operate each toy, and have your students make sliding sounds with their voices to reflect the way the toy moves. Later, invite individual students to lead the class.

Toss Across

Arrange your students in a circle. Pick one student to hold a beanbag. Tell the student holding the beanbag to pick another student, say that student's name, and toss the beanbag to that student. The student who tossed the beanbag should make an ascending and descending vocal glissando that follows the path of the beanbag while it's in the air. He or she should sit as soon as the beanbag is caught. Continue until all children are sitting.

Whale Sounds

Play a recording of whale sounds. Ask the students to guess what animal is making those sounds.

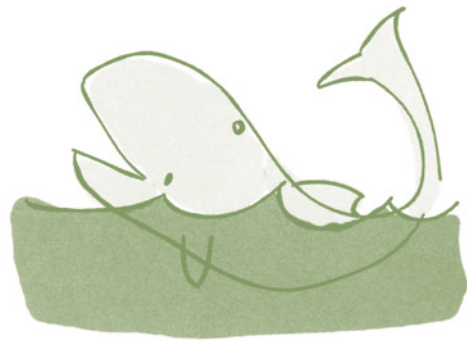

Find or make a whale puppet. Use the puppet to "talk whale" to the class (make humming glissando sounds). Later, have two students hold whale puppets and "talk whale" to each other as well as put on the puppet and lead the class.

Dove variation: "Whoo, whoo."

Cat variation: "Meow, meow."

Flying Puppets

Find or make a puppet of an animal that flies (bird, butterfly, ghost, etc.). Move the puppet in various directions, and have students create vocal glissandi as they follow the puppet's movement. Later, allow individuals to hold the puppet and "talk" to each other as well as put on the puppet and lead the class.

Pitch Exploration Poems and Stories

Big Pig

“Where are you going, Big Pig, Big Pig?”

spoken with a high voice

“Out to the garden to dig, dig, dig!”

spoken with a low voice

“Out in the garden to dig, dig, dig?”

Shame on you Big Pig, Big Pig!”

spoken in a high voice

“I’m sorry, ma’am, but I’m only a pig,

And all I can do is dig, dig, dig!”

spoken with a low voice

The Blue Cockatoo

There’s nothing to do,

And I’m feeling so blue,

With all I’ve been through,

You’d be feeling blue, too. (*descending sigh*)

I live in this zoo

On the banks of Peru,

With a wonderful view,

But still I’m quite blue. (*sigh*)

You see I am new,

Making this zoo debut,

As a fine cockatoo.

So why am I blue? (*sigh*)

Well, just to review,

I am here at the zoo,

With nothing to do

But sit and be blue. (*sigh*)

Though cockatoo view

Might be pleasant for you,

If my story you knew,

You might feel blue, too. (*sigh*)

I was born in Zulu

Where my white feathers grew.

And I hadn’t a clue

Why they soon became blue. (*sigh*)

At first it was new,

Being a blue cockatoo.

No kind of shampoo

Could remove my blue hue. (*sigh*)

But one day as I flew,

A net someone threw.

I wish I knew who

Had found this bird blue. (*sigh*)

So off we soon flew

To a Peruvian zoo.

I bid Zulu adieu

And began feeling blue. (*sigh*)

Now they stand in a queue

To see me be blue.

With each “How do you do?”

I grow even more blue. (*sigh*)

But don’t misconstrue,

Being blue in a zoo,

Beats being found on a menu

As blue cockatoo stew. (*sigh*)

—John M. Feierabend

Cowboy Joe

Cowboy Joe was a bold young man.
He dreamed of rustling cattle, most of all.
He wanted to see if the cows would come
When he let out his cowboy call. *Yee-ha*

He practiced all day from morning 'til night,
And he practiced both summer and fall.
He knew some day he'd have the chance
To try out his cowboy call. *Yee-ha*

Well, finally one day, it was proudly
announced
That his Ma and Pa and all,
Were takin' a trip to his grandfather's ranch
Where he could try out his cowboy call.
Yee-ha

He jumped for joy and grabbed his gear
And he ran back down the hall.
He hopped into the car and was ready to go
To let out his cowboy call. *Yee-ha*

When he arrived at the ranch, he was happy
to see
That the cows were not in the stall.
He dashed to the field where they quietly
grazed
And he let out his cowboy call. *Yee-ha*

Well, they all did come right up to the fence
And he sure felt ten feet tall.

"I'm Cowboy Joe. See how the cows come
When I let out my cowboy call." *Yee-ha*

Now, that was really some day for Cowboy
Joe

And he sure did have a ball.

Now he's wantin' to try bigger and better
things;

So he's practicing his elephant call. (?)

—John M. Feierabend

The Airplane Ride

*Children respond at the end of the lines saying either
"All right!" or "Oh, no!" with rising inflection on
the second syllable.*

A man went up in an airplane. *All right!*
But the airplane didn't have an engine.

Oh, no!

But the man had a parachute. *All right!*

But the parachute wouldn't open. *Oh, no!*

But there was a haystack under him. *All right!*

But there was a pitchfork in the haystack.

Oh no!

But he missed the pitchfork. *All right!*

But he missed the haystack, too. *Oh, no!*

—John M. Feierabend

The Ice Cream Sundae

Today was a day I did everything right,
Though my brother annoyed me, I still didn't
fight.

I played nicely all day, didn't argue or scream.
Now my mom says we'll go for a dish of ice
cream. *mmmm*

I ate all of my breakfast and all of my lunch,
I picked up my toys (and I have a bunch),
And since I've been helpful, like part of
a team,
I think I might ask for two scoops of ice cream.
mmmm

Two scoops! What a treat! But I think you'll
agree,
It would be hard to imagine one better than
me.
I've done everything right, or so it would seem,
Maybe Mom will allow me four scoops of ice
cream. *mmmm*

Yes! Today has been special. It's not every day,
I do everything right, in such a nice way.
So why not, of course, since I'm building up
steam,
Have some syrup on top of four scoops of ice
cream. *mmmm*

"You've been perfect, my dear." That's what
Mom said today,
So I know she won't mind if I have it my way.
To the syrup, add nuts and also whipped cream
And a cherry on top of four scoops of ice
cream. *mmmm*

And yet, when I think about wanting more,
Though it sounds awfully good, I know what's
in store.

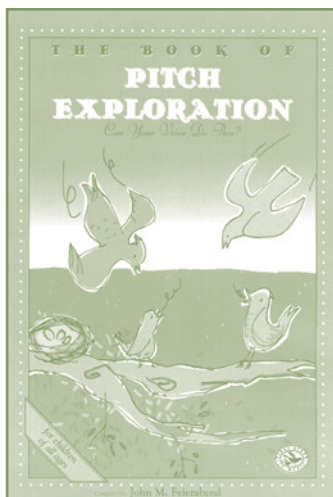

I'll eat and I'll eat and I'll run out of steam,
And I won't feel so good after all that ice
cream. *mmmm*

Since today was a day I did everything right,
I will not spoil my record by making a sight.
I'll ask most politely, though it was fun to
dream,
"May I have one scoop of vanilla ice cream?"
mmmm

—John M. Feierabend

Song Fragments

The Purpose of Song Fragment Activities

These songs are significant in the development of children's musical skills because they provide an opportunity to sing a short phrase alone. Echo Songs invite the child to repeat the same tune and words, while Call-and-Response Songs require children to have pre-learned their part. Echo Songs are easier because children only have to remember one pattern and sing it back. Call-and-Response Songs require children to remember the original pattern after a different pattern has been presented. The final goal is for children to be successful with both Echo Songs and Call-and-Response songs.

Techniques

- Sing *for* the class, not *with* the class. This procedure is critical in developing musical independence in children.
- Use Echo Songs for the earliest lessons, and gradually introduce Call-and-Response Songs.
- You may want to use an imaginary microphone to indicate when it is the leader's turn to sing and when it is the children's turn to sing.
- Over several weeks, work toward individual singing. Try the following process:
 - 1) With a new song, the whole group echoes the leader.
 - 2) After the song is familiar, each child takes a turn echoing a phrase.
 - 3) After children are comfortable echo singing alone, be unpredictable in selecting the next solo singer. Perhaps look at one but invite another child with the microphone, or skip one and return unexpectedly later. This will inspire the children to think through every pattern even when it is not their turn to sing.
- If a child prefers not to sing, move on and give the next child the next phrase.
- Listen for a child who is making a good response, and ask that child to sing the response again. Ask the group to sing the response after that child. Children learn best from good child models.
- If children echo an octave lower than they should (which sometimes happens if the female teacher has a low voice or if the teacher is male), demonstrate both ranges by singing in "my voice" (the lower octave) and "your voice" (in falsetto in the upper octave). Sing a few patterns with "their voice." After they are able to sense the correct placement of their voices, tell them to continue to sing like that while you go back to "your voice." Strive to sing in falsetto as little as possible as it is not a good model of proper vocal tone quality.
- Strive to work on a new Echo Song with group singing and a familiar one with solo singing in each lesson.

- Sometimes sing an Echo Song or a Call-and-Response Song with neutral syllables. Some children may benefit by sometimes singing without the words. Perhaps use a cow puppet and sing the songs with the syllable “moo.”

Things to Remember

- Sing *for* the class, not *with* the class.
- Any response is the right response.
- Present each song or rhyme in at least four different lessons.
- Once the group is comfortable with an activity, invite solo responses.

Echo Songs

No More Pie

No more pie...

Pie's too sweet...

I want a piece of meat...

Meat's too red.

I want a piece of bread...

Bread's too brown...

I think I'll go to town...

Town's too far...

I think I'll take a car...

Car won't go...

I fell and stubbed my toe...

Toe gives me pain...

I think I'll take a train...

Train had a wreck...

I fell and hurt my neck...

Oh, my...

No more pie...

Wise Old Owl

Leader: Group:

One of these days, One of these days,
Look up and see, Look up and see,
A wise old owl, A wise old owl,
Sit - ting in a tree. Sit - ting in a tree.

Verse 2

He'll look at you...
And he'll look at me...
Those two big eyes...
They don't scare me...

Verse 3

One of these nights...
When raindrops fall...
He'll give a hoot...
He'll give a call...

My Aunt Came Back

Leader:	Group:
Oh, my Aunt came back,	Oh, my aunt came back,
From Tim - buck - tu,	From Tim - buck - tu,
She brought with her,	She brought with her,
A wood - en shoe.	A wood - en shoe.

Add motions with each verse.

Verse 1

tap foot

Verse 2

Oh my aunt came back...

From old Japan...

She brought with her...

A waving fan...

also fan face with one hand

Verse 3

...from old Algiers...

...a pair of shears...

also "snip" using two fingers of other hand

Verse 4

...from Guadeloupe...

...a hula hoop...

also rotate hips

Verse 5

...from the county fair...

...a rocking chair...

also rock back and forth

Verse 6

...from the city zoo...

...a nut like YOU!...

stop motions and point at group;

they point at you

Bill Grogen's Goat

Leader: Group:

There was a man, There was a man,
Now please take note, Now please take note,
There was a man, There was a man,
Who had a goat. Who had a goat.
He loved that goat, He loved that goat,
In - deed he did, In - deed he did,
